

UNIVERSITY OF KANSAS LIED CENTER

The Lied Center of Kansas is one of the premiere performing arts venues in the region. It hosts a variety of music and dance performances, as well as major campus and community events. AVANT ACOUSTICS worked on a recent multipurpose event space addition.

AVANT ACOUSTICS provided the following services:

- Room acoustics consultation
- Architectural and mechanical/electrical noise control

Project Highlights:

AVANT ACOUSTICS consulted on the design of the main lobby and the Lied Center Pavilion to ensure proper acoustical characteristics for musical performances and lectures. The Pavilion is a truly multipurpose space that was designed with specific intent to provide outstanding acoustics for smaller musical recitals.

One acoustical challenge in the space was an exterior glass curtain wall that formed the back wall of the room. Particular attention was given to this construction for proper acoustic room shaping and noise control.

Project Location:

Lawrence, Kansas

Facilities:

Multipurpose Event Space

Client:

Helix Architecture + Design

Designer:

John V. Fricke
